HOTEL
Valley Ho

Scottsdale, AZ

INTERNET OPTIONS.

COMPLIMENTARY INTERNET SERVICE

512 KBPS | Free

This service is available throughout the hotel property. Guests can access this via the registered guest name and room number. This speed is primarily used for basic web browsing and general email correspondence.

UPGRADED WIRELESS INTERNET SERVICE OPTIONS

3 MBPS | \$9.99 per connection*

This speed is ideal for file downloads, streaming music, large email files, social media use, and accelerated web browsing.

5 MBPS | \$14.99 per connection*

In addition to the capabilities noted above, this connection speed can handle video streaming, advanced gaming, and large file sharing/downloading.

The fees for upgraded internet service speeds can either be the responsibility of each individual guest through the use of their name and room number, which will bill to the guest room folio, or directed to the group master account and accessed through a pre-determined customized access code. These services and codes can be established through the hotel sales or conference services manager. If upgraded internet access is purchased for all attendees to use at will, there are discounted bulk rates available from the prices noted above. Or, if a program wants to provide an upgraded speed level for its attendees but only wants to pay for the number of actual log-in uses, this can also be accommodated, but please note no pricing discounts will apply. Ask your hotel representative for details.

DEDICATED CONNECTIVITY.

Hotel Valley Ho offers a dedicated data pipe connection that can be directed to its meeting rooms and ballroom spaces. This data pipe is perfect for video conferencing or establishing a stand-alone connection to ensure optimal performance.
